

## Post-school destinations 2024

Post-school destinations are only reported for schools in Victoria, Queensland, Western Australia (government schools only) and the ACT (government schools only).

### Victoria

Post-school destinations are not available for the 2024 Victorian Year 12 completer cohort.

### Queensland

The source of Queensland post-school destination data is the annual Next Step survey, collected approximately six months after students who completed Year 12 left school. All students who were awarded a Senior Education Profile (SEP) from the Queensland Curriculum and Assessment Authority, including international students, were included in the survey. Please note that:

- Respondents who were offered a university placement, but deferred, have been reported according to their engagement at the time of the survey.
- Some students who completed Year 12 were able to undertake bachelor's degree programs at TAFE or a private institution and are categorised into university.
- Respondents who were undertaking an apprenticeship or traineeship are categorised into TAFE/Vocational study.
- Due to confidentiality reasons, schools with fewer than five respondents are not reported.

### Western Australia

Post-school destinations are not available for the 2024 WA Year 12 public school completer cohort.

### Australian Capital Territory (ACT)

The post-school destination calculations are based on students who completed an ACT Senior Secondary Certificate in 2024 and responded to the School Leaver Survey, conducted in May and June 2025. The survey excluded graduates who were full fee-paying students whose usual residence was overseas. Students who were studying are classified as either studying at university or TAFE/Vocational. The proportion of students classified as employed excludes students who were also studying. Students who were offered a university placement, but deferred, have been reported according to their engagement at the time of the survey.
